Annual Wellness Visit

Health in your hands

Annual wellness visits are important for good health

Preventive care tells you about your health before it gets bad. It is a covered benefit under your health plan. It includes regular visits to your primary care provider, screenings and vaccines.

All members of your family should see their primary care provider once a year for an annual wellness visit. These visits keep your family healthy. They can find and prevent problems before they happen.

Visit myuhc.com/communityplan to find a provider.
